Address: _____	Road: _____	Length (ft): _____
Specific limits of dust palliative application (area must be marked): _____		
_____		
_____		

**Please be as specific as possible when describing the limits of application, i.e. distance each way from driveway of listed address. \*\*\*IF SPECIFIC INSTRUCTIONS ARE NOT GIVEN, DRIVEWAY WILL BE CENTER OF DUST ABATEMENT APPLICATION\*\*\***

**CONDITIONS OF PERMIT:**

**This program only applies to County maintained roads.** Permit Applications and payment to "piggy-back" on the County's bid price for dust palliative will be due May 22nd. You may call 406-258-3710 for your fee based on number of feet you are applying to have abated. If the deadline is missed the applicant may still have a Contractor apply dust palliative, but the Contractor must apply for the permit using the 'Independent Contractor Dust Permit Application' available on our website at <https://www.missoulacounty.gov/departments/public-works/roads/dust-abatement>. Those permits may be issued between May 1 and September 15.

The Missoula County Road Department will do all of the work, including preparation and spraying, for resident dust abatement as part of the County program. This will generally start around the 4<sup>th</sup> week of June. The permittee must be specific when describing areas to be prepared and the areas must be marked with flags supplied by the County no later than June 16<sup>th</sup>. (If flags aren't placed in time, your payment will be refunded to you.) In order to accurately track the amount of dust palliative applied, the County is required to have a measuring device in the application truck. Because of this, the permittee agrees to pay for the actual amount treated with dust palliative as measured by the County, not the amount estimated on the permit.

The Missoula County Road Department has an obligation to maintain roads any time road conditions deteriorate for the safety of the traveling public, regardless of when dust palliatives have been applied. Therefore, gravel roads may be graded even if a dust palliative has been applied. After September 15, all roads will be subject to preparation for winter maintenance.

All information provided above is correct to the best of my knowledge. I have read and understand all conditions of this permit, written or implied.
